

EDGAR

HOVSEPYAN

Senior HTML5 Game Developer — iGaming · PixiJS v8 · WebGL/WebGPU · *AI Engineering*

All about the feel — the weight of a spin, the snap of a reel stop. 7+ years, 50+ casino titles shipped end-to-end, plus the production AI pipelines the team runs on.

EXPERIENCE

Senior HTML5 Game Developer Mar 2024 - Present
Pascal Gaming / BetConstruct — Yerevan (hybrid)

- Develop and ship Pascal Gaming's full casino catalogue in full-cycle **PixiJS v8 / TypeScript** across 14+ verticals — slots, live & 3D roulette, blackjack, baccarat, crash, Plinko, Mines, poker, Deal-or-No-Deal.
- Co-developed **Non-Stop Roulette** (SBC Awards Americas 2025 GotY shortlist) as part of the game team.
- Architected** the studio's Spine + particle VFX web editor and an AI animation-benchmark / QA tool for the art team.
- Built and own the team's **Claude Code + MCP build pipeline**; sustain 120 fps on mobile win ceremonies via batching, GPU instancing & zero-GC pooling; mentor mid & junior devs.

Team Lead · Metaverse Platform Engineer 2020 - Mar 2024
Fastexverse / PandaMR

- Scaled a metaverse-aggregator platform from prototype to production as founding engineer & team lead across Unity, Unreal, front-end, back-end & QA.
- Shipped live in-world events & ticketing, immersive 3D worlds (VR/AR/WebXR), in-world casino integrations, Web3 wallets & on-chain transactions; introduced the team's first AI tooling.

HTML5 Game Developer — iGaming (Freelance) 2019 - 2023
Extra Studio LLC — freelance / contract

- Built mini-games, mini table games and playable ads — the studio's highest-volume output — concept to art integration in Three.js & PlayCanvas; mentored juniors.

Three.js Developer 2018 - 2019
Arakssys

- Built virtual rooms & computer-vision measurement for apartment visualisation — Three.js + React; tuned rendering accuracy & cross-browser performance.

Front-End Developer 2017 - 2018
WebApricot

- Delivered responsive cross-browser pages and early Three.js / WebGL builds — where the custom-shader habit started.
