SUMMARY

I build real-time games for the web. In seven years I have shipped 50+ casino titles end to end at Pascal Gaming (BetConstruct) and Extra Studio, from 2D slots and physics games to live and 3D roulette, on PixiJS, Three.js and custom WebGL/WebGPU pipelines. Before that I led a cross-functional Unity, Unreal, front-end, back-end and QA team for four years building VR/AR/WebXR worlds at a metaverse platform. I care about the hard parts: deterministic physics that lands exactly on the server-decided outcome, 120 fps win ceremonies on mid-tier phones, and code that survives a regulated industry's certification review.

PROFESSIONAL EXPERIENCE

Senior Game Developer

Mar 2024 – Present

Pascal Gaming / BetConstruct — Yerevan (hybrid) · a deliberate return from platform leadership to hands-on game development

- Develop and ship Pascal Gaming's full casino catalogue in full-cycle PixiJS v8 / TypeScript across 14+ game verticals — slots, live & 3D roulette, blackjack, baccarat, Hi-Lo, crash, Plinko, Mines, poker and Deal-or-No-Deal.
- Co-developed **Non-Stop Roulette** as part of the game team — **SBC Awards Americas 2025 Game of the Year shortlist** (certified across Colombia, Peru & Brazil).
- Architected the studio's Spine + particle VFX web editor used daily by the art team, and built an AI animation-benchmark / QA tool that flags off-spec animations before integration.
- Built and own the team's Claude Code + MCP build pipeline (asset packing, atlas generation, prototyping); mentor mid- and junior developers.
- Sustain 120 fps on mid-tier mobile during win ceremonies via draw-call batching, GPU instancing and zero-GC object pooling.

Shipped titles (playable demos): [Flaming Heart](#), [Golden Tree](#), [Sugar Balloon](#), [Franken Alive](#), [Juicy Storm](#), [Super Blaize](#), [Multiplier Blackjack](#), [Bet on Poker](#), [Mega Plinko](#).

Team Lead / Metaverse Platform Engineer

2020 – Mar 2024

Fastexverse / PandaMR

- Scaled a metaverse-aggregator platform from prototype to production as founding engineer and team lead of a cross-functional group across Unity, Unreal, front-end, back-end and QA.
- Shipped live in-world events & ticketing, immersive 3D worlds (VR / AR / WebXR), and in-world casino / iGaming brand integrations.
- Delivered wallet and on-chain payment integrations inside the platform.
- Introduced and led adoption of the team's first AI tooling.

Game Developer (Freelance)

2019 – 2023

Extra Studio LLC — freelance, alongside the Fastexverse role

- Built mini-games, mini table games and playable ads — the studio's highest-volume output line — from concept to art integration.
- Optimised gameplay in Three.js and PlayCanvas for desktop and mobile; mentored junior developers.

Three.js Developer

2018 – 2019

Arakssys

- Built virtual rooms and computer-vision measurement for apartment renovation and visualisation in Three.js + React; tuned rendering accuracy and cross-browser performance.

Front-End Developer

2017 – 2018

WebApricot

- Delivered responsive, cross-browser pages and early Three.js / WebGL builds — the start of the custom-shader practice carried into every role since.

SELECTED PROJECTS

- **Spine + particle VFX web editor** — in-house authoring tool / viewer for the art team, plus an AI animation-benchmark / QA tool.
- **Claude Code + MCP skill library** — large internal Claude Code skills + MCP toolchain automating asset packing, atlas generation and prototyping.
- **WhatsApp AI sales agent** — production RAG / Pinecone vector-search agent.
- **Indie slot studio on Stake Engine** — solo full-stack slots, concept to publishable.
- **EV-charging platform** — solo build on NestJS / OCPP.

TECHNICAL SKILLS

Rendering & Game Engines: PixiJS v7/v8, Three.js, Babylon.js, PlayCanvas, Cocos Creator, WebGL

Graphics & Performance: WebGPU, WGSL / GLSL shaders, GPU instancing, draw-call batching, KTX2, 120 fps mobile targets

Physics & Simulation: Matter.js, Rapier, Cannon / Ammo, deterministic replay

Animation & Assets: Spine, particles, mobile-first canvas

Languages & Architecture: TypeScript, JavaScript, React, MobX, Redux, RxJS

Real-Time & Networking: SignalR, WebSockets, reconnection and session recovery

Engine Leadership: Unity, Unreal (platform-lead level: scoping, review, integration)

AI-Assisted Tooling: Claude Code + MCP build pipelines used daily; RAG (Pinecone) and NestJS side projects

EDUCATION & CREDENTIALS

- **Anthropic — AI Engineering:** Claude, MCP & Agents (self-directed), 2024–2025
- **Polytechnic University of Armenia** — Electrical Energy, 2014–2018
- **TT-Soft & LevelUp** — Web Programming (JS / React), 2017–2018

AWARDS & LANGUAGES

Awards: SBC Awards Americas 2025 — Game of the Year shortlist · Non-Stop Roulette, Pascal Gaming (team credit). · B.F.T.H. Arena Awards 2024 — Finalist.

Languages: English (professional working proficiency) · Russian (full professional proficiency) · Armenian (native).
